

Milestone 3: Database Design – Step-by-Step Process

Objective

Create the **Leave Request** table and all required fields for the Smart Leave Approval System.

Step 1: Open Studio

Navigate to:

All → Studio

Open:

Smart Leave Approval System

Step 2: Create Leave Request Table

Click:

Create Application File

Select:

Data Model → Table

Fill:

Field	Value
Label	Leave Request
Name	Leave Request
Extends Table	None

Click:

Create

Step 3: Verify Table Creation

A table similar to this will be created:

x_1877519_smart_0_leave_request

(Your scope prefix may differ.)

Create Fields

Step 4: Create Leave Number Field

Click:

Create Application File
→ Table Column

Fill:

Field	Value
Table	Leave Request
Label	Leave Number
Type	String

Save.

Step 5: Create Employee Field

Create a new column.

Field	Value
Table	Leave Request
Label	Employee
Type	Reference
Reference User	User [sys_user]

Save.

Step 6: Create Manager Field

Field	Value
Table	Leave Request
Label	Manager
Type	Reference
Reference User	User [sys_user]

Save.

Step 7: Create Leave Type Field

Field	Value
Label	Leave Type
Type	Choice

Save.

Add Choices:

Label

- Casual Leave
 - Sick Leave
 - Earned Leave
 - Emergency Leave
-

Step 8: Create Start Date Field

Field	Value
Label	Start Date
Type	Date

Save.

Step 9: Create End Date Field

Field	Value
Label	End Date
Type	Date

Save.

Step 10: Create Total Days Field

Field	Value
Label	Total Days
Type	Integer

Save.

Step 11: Create Leave Reason Field

Field	Value
Label	Leave Reason
Type	String (Large Text)

Save.

Step 12: Create Approval Status Field

Field	Value
Label	Approval Status
Type	Choice

Save.

Add Choices:

Label

- Pending
 - Approved
 - Rejected
-

Step 13: Create AI Risk Assessment Field

Field	Value
Label	AI Risk Assessment
Type	Choice

Save.

Add Choices:

Label

Low
Medium
High

Step 14: Create AI Recommendation Field

Field	Value
Label	AI Recommendation
Type	String (Large Text)

Save.

Step 15: Create Created By Field (Optional)

Field	Value
Label	Requested By
Type	Reference
Reference	User [sys_user]

Save

Step 16: Configure Auto Number

Open the **Leave Request** table.

Set:

Field	Value
Auto Number	Checked
Number Prefix	LEV
Number	1000

Save.

Example:

LEV001000
LEV001001
LEV001002

Step 17: Verify Table Structure

Your table should contain:

Field
Leave Number
Employee
Manager
Leave Type
Start Date
End Date
Total Days
Leave Reason
Approval Status
AI Risk Assessment
AI Recommendation

Leave Request - Default view: Table • Smart Leave Approval System

New Module: Module • Smart Leave Approval System

App details: Leave Request

Fields (8) Components (2) More

+ Add a field in the table

Created Date/Time

Created by String

Employee Reference: User

Manager Reference: User

Status Choice

Updated Date/Time

Updated by String

Updates Integer

Default view: One-column

Leave Request

Leave Number

Employee User [sys_user]

Manager User [sys_user]

Leave Type Casual Leave

Start Date 2008-12-06 18:47:00

The date must match format: yyyy-MM-dd

End Date 2008-12-06 18:47:00

The date must match format: yyyy-MM-dd

Total Days 123,456

Leave Reason

Step 18: Test Record Creation

Navigate to:

System Definition → Tables

Open:

Leave Request

Create a sample record and verify all fields appear.
