

Milestone 9: Dashboard, Reporting, and Analytics Implementation

Objective

The objective of this phase was to develop dashboards and reports that provide real-time visibility into leave management activities. These analytics help managers and administrators monitor leave trends, approval statuses, and employee leave patterns.

Overview

To improve decision-making and operational visibility, reporting and dashboard capabilities were implemented in the Smart Leave Approval System.

The dashboard consolidates key leave management metrics into a single interface, allowing managers to quickly understand the current state of leave requests within the organization.

Report Development

Purpose

Reports were created to analyze leave request data and present meaningful insights.

Benefits

1. Improved monitoring
 2. Better decision-making
 3. Increased transparency
 4. Real-time visibility
-

Report 1: Total Leave Requests

Description

Displays the total number of leave requests submitted by employees.

Data Source

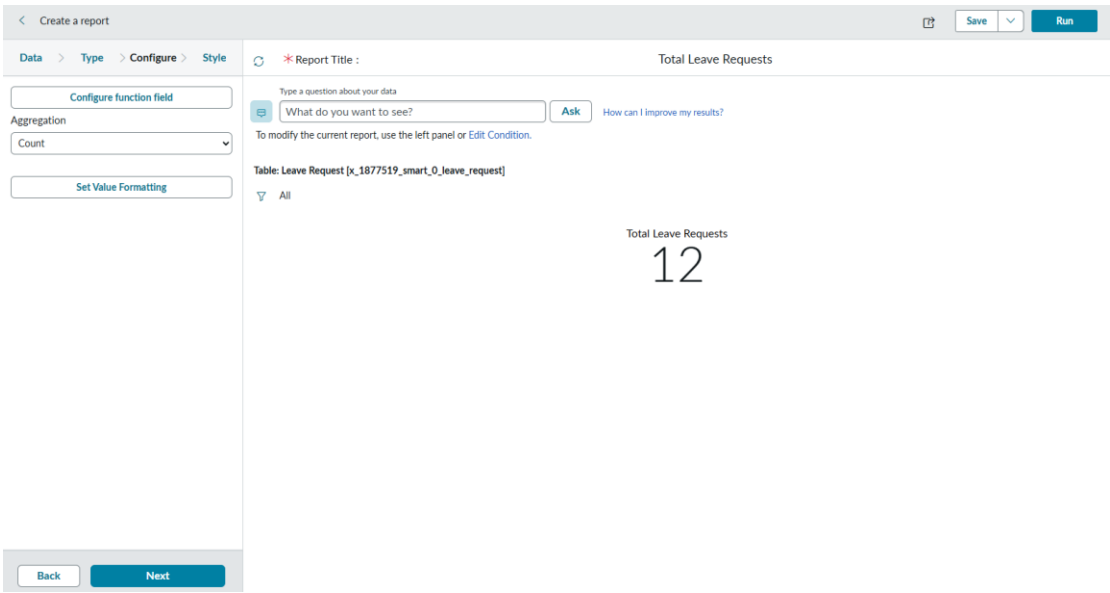

Leave Request Table

Type

KPI Report

Purpose

Provides an overview of system usage.

Report 2: Leave Requests by Status

Description

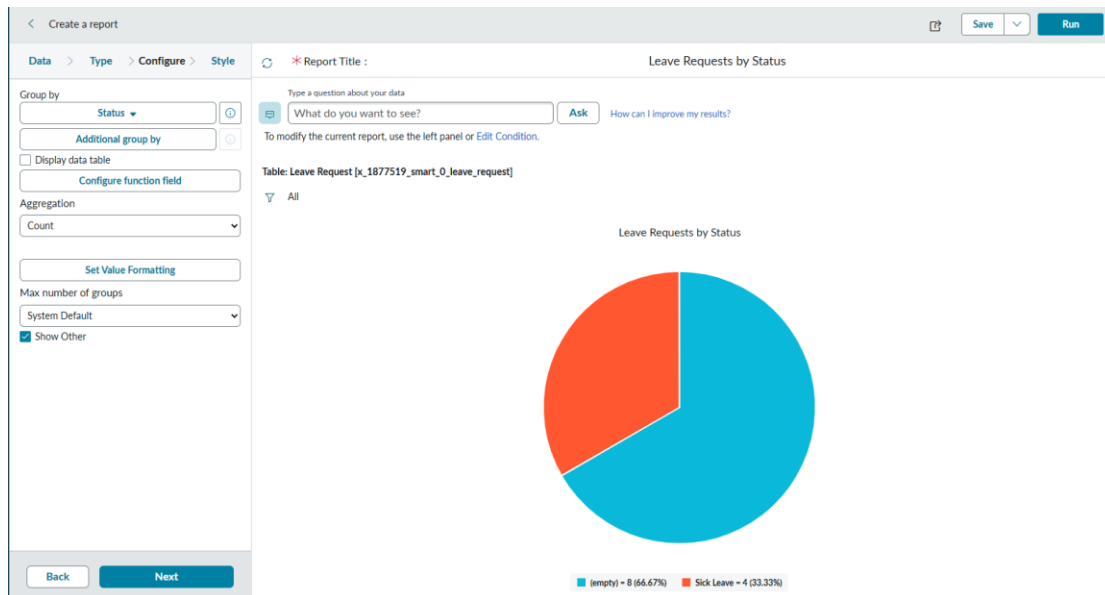

Displays leave requests categorized by approval status.

Categories

- Pending
- Approved
- Rejected

Report Type

Pie Chart

Purpose

Allows managers to quickly identify pending approvals and approval trends.

Report 3: Leave Requests by Leave Type

Description

Displays leave requests grouped by leave category.

Categories

- Casual Leave
- Sick Leave
- Earned Leave
- Emergency Leave

Report Type

Bar Chart

Purpose

Analyzes leave distribution across different leave types.

Report 4: AI Risk Assessment Analysis

Description

Displays leave requests categorized by risk level.

Categories

- Low Risk
- Medium Risk
- High Risk

Report Type

Donut Chart

Purpose

Helps managers identify potentially critical leave requests.

Dashboard Design

Dashboard Name

Smart Leave Approval Dashboard

Dashboard Components

KPI Indicator

Metric

Total Leave Requests

Purpose

Displays the total number of leave requests.

Pie Chart

Metric

Requests by Status

Purpose

Shows the distribution of Approved, Rejected, and Pending requests.

Bar Chart

Metric

Requests by Leave Type

Purpose

Visualizes leave categories.

Donut Chart

Metric

AI Risk Assessment Analysis

Purpose

Displays the distribution of Low, Medium, and High-risk requests.

Dashboard Layout

The dashboard was designed using multiple widgets arranged in a user-friendly layout.

Top Section

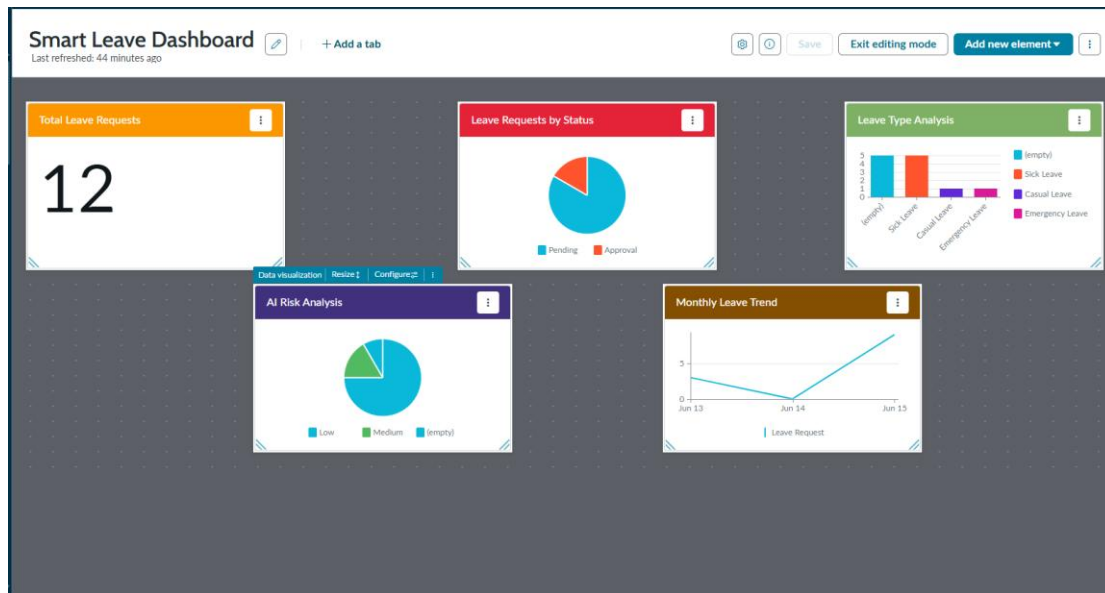

- Total Leave Requests KPI

Middle Section

- Requests by Status Pie Chart
- Requests by Leave Type Bar Chart

Bottom Section

- AI Risk Assessment Analysis

Analytics Benefits

Real-Time Monitoring

Managers can monitor leave activity instantly.

Better Decision Making

Visual reports provide actionable insights.

Trend Analysis

Historical leave patterns can be analyzed.

Operational Visibility

Provides a centralized view of leave-related activities.

Dashboard Security

Access to dashboard components is controlled using roles.

Manager Role
